

SUPER SMELLIES

SCENTED PENS FOR ANESTHESIC AND RESPIRATORY APPLICATIONS

Meet the Super Smellies!

Putting on a breathing mask can be uncomfortable, tense or scary. The superhero group called Super Smellies is going to change that! Choose a superhero who will then leave its super scent in the breathing mask.

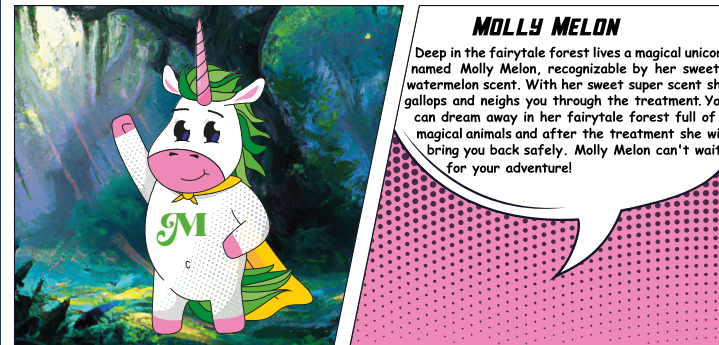

These scented markers for anesthetic and respiratory applications do not only motivate patients to keep breathing through the mask, but also supports the patients mentally during the treatment. Together, the Super Smellies ensure that the patient gains perseverance, enabling the doctors to carry out the treatment as effectively as possible.

Not one, but four!

The Super Smellies includes four scented pens, consisting of the scents cola, banana, watermelon and strawberry. Plenty of variation to offer the best choice for anyone. On top of that the pens are easy and safe to use!

Using the desired scent, simply draw a circle inside the breathing mask and place the mask on the patient's face. Just this action is enough to relieve fear and stress and improve the overall experience.
